

Nirankar Jaiswar

Software Engineer

M: +64 22 545 7705 | Email: nirankarjaiswar@gmail.com

Portfolio: [nirankar-potfolio.vercel.app](#) | LinkedIn: [NirankarJaiswar](#)

PROFESSIONAL SUMMARY

- Dynamic and results-driven Software Engineer with 3+ years of hands-on experience in full-stack development, specializing in React, Vue.js, Node.js, and Express.js.
- Currently in the final trimester of a Master of Information Technology at Whitireia and WelTec (NZ), holding full working rights.
- Strong collaborator who thrives in Agile teams, values continuous learning, and contributes proactively to solving complex technical and business challenges

SKILLS

Front-End Development

- React.js | Next.js | Redux
- Vue.js | TypeScript
- Ant Design | Vuetify | Tailwind | Mui

Back-End Development

- Node.js | Express.js
- REST | Microservices
- Python

Database | Testing

- SQL | PostgreSQL | MongoDB
- Unit Testing: Jest
- Integration Testing: Postman

Soft Skills

- Team collaboration
- Effective communication
- Adaptability and flexibility
- Problem solving

Cloud | CI/CD

- AWS | Azure
- Jenkins | Docker
- GitHub | Vercel
- Grafana

AI/ML Core Technologies

- Tensorflow.js | Tensorflow | Pytorch
- Scikit-learn, OpenCV | LCS (XCS)
- LLM APIs

WORK EXPERIENCE

Woolworths NZ – Wellington

MultiSkill/Major Fill Assistant

March 2025 – Present

- Managed stock, replenishment, and rotation across all departments, ensuring availability and freshness.
- Worked with a diverse team, improving communication and teamwork.
- Adapted quickly to NZ retail culture, Strengthened teamwork, time management, and communication skills while completing postgraduate studies.

Apexon | Iorta Technology Solutions | Amiti Software Technologies

Software Engineer – Full Stack (Frontend + Backend)

Mumbai & Bangalore, India

Aug 2021 – Jan 2025

- Developed scalable full-stack applications using React, Vue.js, Redux, Node.js, Express.js, enhancing performance and responsiveness across enterprise projects.
- Engineered and optimised backend APIs with Node.js + Express, Java, achieving up to 25% faster API response times and improving reliability through Postman integration testing.
- Built modern, reusable UI components using React, Vue.js, Vuetify, Ant Design, contributing to 20% improvement in frontend responsiveness across diverse applications.
- Improved code quality by creating unit tests (Jest) and supporting integration testing, reducing regression issues across multiple teams.
- Leveraged Jenkins and Docker to contribute to automated CI/CD pipelines, supporting smoother and more consistent deployments.

- Used Grafana for backend monitoring, identifying and resolving issues during QA and production phases.
- Worked closely with cross-functional teams (QA, backend, design, stakeholders) to deliver features in Agile sprints, participating in sprint planning, standups, and retrospectives.
- Performed seamless frontend–backend API integrations, ensuring aligned data flow and consistent user experience across applications.

Web Development Intern

Dec 2020 – May 2021

- Developed and tested features in a full-stack team, gaining hands-on experience with React, Node.js, and version control workflows.
- Mentored junior interns and created internal documentation for handovers.
- Deployed completed websites to shared hosting environments and ensured cross-browser compatibility.

PROJECT

Portfolio Website - Personal

- Built a high-performance, responsive React/TypeScript portfolio using Vite for 10× faster builds.
- Mobile-first design with Tailwind CSS; interactive elements and smooth animations via Framer Motion.
- Tech: React, TypeScript, Vite, Tailwind CSS, Framer Motion
- Git - [nirankar-jaiswar](#)

Smart Toll Collection System using Ethereum Blockchain

- Built a decentralized toll payment system using Solidity smart contracts and Web3.js.
- Enabled secure, transparent transactions between vehicles and toll stations on the Ethereum network.
- Designed a simple React-based frontend to visualize blockchain data and transaction history (In progress building frontend)

Facial Emotion Recognition using Learning Classifier Systems (Coursework Project)

- Developed a facial emotion recognition model using image preprocessing (grayscale, resize, normalize) and feature extraction with LBP and HOG, combined into a single feature vector.
- Implemented XCS (eXtended Classifier System) for interpretable IF–THEN emotion rules.
- Benchmarked XCS against SVM, Random Forest, and MLP; evaluated with accuracy, precision, recall, F1-score, and confusion matrices.
- Tools: Python, OpenCV, scikit-image, scikit-learn, XCS, SVM, Random Forest, MLP, Matplotlib, Seaborn, NumPy, Pandas.

Master's Thesis – Advanced AI Framework Comparison and Evaluation

- “A Comparative Analysis of JavaScript-based AI Frameworks for Browser-based Machine Learning in Terms of Performance and Scalability”
- Conducting experimental evaluation of TensorFlow.js, ONNX.js, and Brain.js against Python-based frameworks like TensorFlow and PyTorch.
- Assessing models based on performance, scalability, and browser execution efficiency under identical conditions.

CERTIFICATION

AWS Certified Solutions Architect - Associate

Issue Date – Jul 25, 2025 Expiration Date – Jul 25, 2028

EDUCATION

Whitireia and WelTec Wellington: Master of Information Technology - 2025 - Present

University of Mumbai: Bachelor of Science (Computer Science) - 2017 - 2020 - 7.38 CGPA
